

Our team develops cutting-edge robotics technologies that combine machine learning, artificial intelligence, and classical robotics. This involves the design and implementation of algorithms that run on a robot in real-time in an uncontrolled environment, involving autonomous interactions with the environment.

The work of intern will be tested on state-of-the-art robotic hardware, both in simulation and in the real world. In this role, you will play a crucial role in the development of innovative projects, working alongside a world-class engineering in our team VOIAR.

### **WHAT DOES THE INTERNSHIP INCLUDE?**

Web Development:

- Programming AI - Building a self-driving robot.
- Service management
- Robot Management
- Software Implementation and Development
- Develop the artificial intelligence software and applications for business use.

### **EXPECTATIONS**

We are looking for a talented AI Developer to join us.

You bring:

- Demonstrable experience in software architecture and development
- Desire for challenges
- Attention to details.

Knowledge of:

- Docker
- HTML/CSS/Javascript
- Python
- Linux
- Technology used:
- Gstreamer
- Balena
- Zerotier / Wireguard
- I2C
- Raspberry Pi
- Nvidia Jetson
- Pytorch
